R 1.00 / ticket	R -	R -	R -	R -	R -
Total	R 220.00	R 440.00	R 88.00	R 3 300.00	R 4 048.00
Scanning and Printing at Event Costs					
Total					R 4 048.00

Profit Generated:
R 53,900.00 - R 4,048.00 = R 49,852.00

Notes:

It is evident that if the tickets were printed earlier, more would have been sold. However, given the ticketing trends in Swaziland, buyer traffic normally peaks a week before the event. A lead time of one (1) month for ticket availability should be allocated to ensure that a greater percentage is sold.

Secure Ticketing For All Events

INNOVATORS IN TICKETING SOLUTIONS

We understand that secure event ticketing is and has always been a challenge. To address this issue, we have developed secure ticketing solutions through the use

of barcodes. Every ticket generated is assigned a unique barcode to curb duplication. All barcodes are securely stored on a remote server.

TICKET VERIFICATION/SCANNING

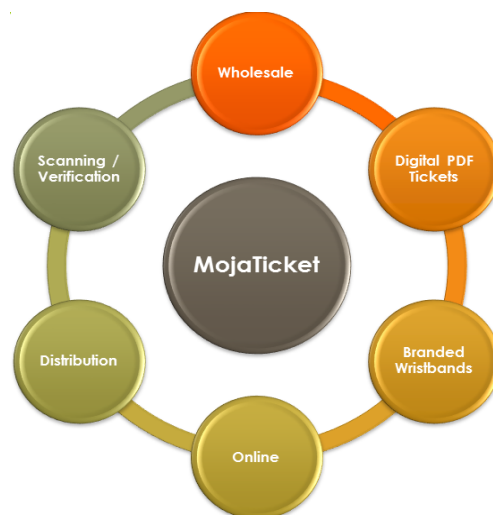

Barcode scanners are used to verify tickets and deactivate from our servers. Based on experience, to effectively manage queue problems, we have had to design a mobile solution to verifying tickets using the popular Android technology. This will dramatically speed up the scanning process and make entry into the event venue faster by reducing congestions at entry point.
